Syahroni.

SUMMARY

Frontend Developer with experience in building modern web applications using **React.js** and **Next.js**. Skilled in developing scalable UI architectures using Atomic Design principles and modern state management solutions. Experienced in collaborative team environments with strong problem-solving abilities, and focused on clean code practices, application performance, and development efficiency.

EXPERIENCE

PT. Kreasindo Karya Abadi

August 2025 - Now

Frontend Developer

- Developed reusable UI components following Atomic Design principles
- Improved code readability and maintainability through standardized coding practices
- Enhanced application performance and optimized project structure

PT. Spero Mahakarya Nusantara

March 2025 - August 2025

Frontend Developer

- Developed application features using Next.js in accordance with project requirements
- Designed system architecture aligned with project goals and technical specifications
- Collaborated cross-functionally to ensure implementation met business requirements

Kampus Merdeka X Alterra Academy Batch 6

January 2024 - July 2024

Frontend Engineer With React Js

- Maintained an average academic score above 90
- Led the frontend development as Lead Frontend Developer in the Capstone Project
- Managed time effectively to complete tasks on schedule

Pribadi Premiere School

November 2024 - January 2025

Staff IT

- Successfully developed and maintained a school CMS website
- Troubleshoot and resolved issues during new feature development
- Demonstrated effective time management to ensure timely task completion

TECH STACK

Programming Language : **HTML, CSS, Javascript, Typescript, PHP MVC**

Frontend : **React Js, Next Js, Vue Js, React-Query, Redux-Toolkit, Socket IO, Tailwind Css, MUI, Zustand**

Backend & Database : **Node Js, Express Js, Prisma, MongoDB, Firebase, MySQL**

Tools : **Git, Github, Postman, Vite, Figma**

Soft Skill : **Problem Solving, Good Teamwork, Good Communication**

EDUCATION

Universitas Indraprasta PGRI

S1 Informatic Engineering - **IPK 3,68**

PROJECT

Local Place

March 2025

Tech Stack : Next js, MUI, Typescript, Axios, React-Query, QuickChart

- Built Event and Coworking Space booking features
- Implemented a dynamic seat selection system aligned with venue layout
- Streamlined user reservation and check-in workflows
- Refactored a module from over 1000 lines of code to fewer than 300 lines

Link :<https://www.localplace.id>

Attendance

August 2023

Tech Stack : Next Js, Redux-Toolkit, Tailwind Css, SweetAlert2, Firebase

- Developed an online student attendance system
- Built a real-time attendance monitoring dashboard for lecturers
- Developed the application end-to-end from development to production

Link : <https://attendance-mini-project.vercel.app>

Plantopia

Juny 2024

Tech Stack : Next Js, Axios, Redux-Toolkit, Tailwind Css, Framer motion, React-Quill

- Built the main landing page and mobile panel for plant data management
- Developed complex CRUD features across six integrated pages
- Implemented plant data management with structured forms and complex validation logic
- Led a frontend team of five engineers to deliver project features effectively
